SUMMARY

Fullstack Developer with 3 years of experience, specializing in React, Python/Django, Go, and AWS, with a focus on cloud architecture design and scalable solutions. Skilled in building high-performance web apps, integrating systems, and optimizing cloud infrastructure.

EXPERIENCE

Software Engineer

Tata Communications

07/2023 - Present, Bengaluru, India (Hybrid)

- Engineered backend services for enterprise CPaaS channels, facilitating seamless integration with global partners such as Shopify, HubSpot, and Zoho.
- Architected a modular integration framework using Python and Django to enhance system flexibility and accelerate partner onboarding workflows.
- Optimized AWS cloud infrastructure and serverless deployments, leveraging Terraform to improve resource utilization and reduce operational costs.
- Collaborated on the development of multi-tenant React applications and maintained robust CI/CD pipelines to ensure consistent delivery.
- Strengthened system reliability through rigorous unit testing with Pytest and proactive performance tuning within distributed environments.

Freelance Developer

Upwork

05/2021-01/2023, Lucknow, India (Remote)

- Designed and delivered responsive web applications and CMS solutions, ensuring high-quality user experiences across diverse platforms.
- Integrated third-party APIs and custom modules to extend CMS functionality and improve overall application performance.
- Maintained clean, scalable codebases while ensuring cross-browser compatibility and adherence to modern web standards.

Frontend Developer (Internship)

Solera Life Sciences Private Limited- Official

09/2021-01/2022, New Delhi, India (Remote)

- Developed single-page React applications for a doctor-patient management system, enhancing user interaction and workflow efficiency.
- Integrated RESTful APIs for dynamic data handling, ensuring smooth communication between front-end and back-end systems.
- Employed tools like Babel, Webpack, and NPM to streamline the development and build process.
- Collaborated within cross-functional teams and actively participated in Agile sprints to ensure timely delivery of features.
- Engineered and maintained scalable front-end modules for 3 web apps over 6 months, utilizing React.js and integrating REST APIs to deliver near real-time patient data updates that improved data processing speed by 30%.
- Implemented REST API endpoints integration across 3 web apps over a 6-month internship using Axios and Redux, achieving a 30% faster patient data sync and supporting 100+ user sessions daily for enhanced reliability.
- Integrated AWS Lambda functions into React-based web apps over a 6-month internship to automate real-time processing of patient records, reducing backend response times by 25% and supporting scalable operations for 3 projects involving 100+ daily users.

EDUCATION

B.Tech in Engineering

SRM Institute of Science and Technology • Chennai, India • 07/2019-07/2023

Intermediate (PCM)

City Montessori School • Lucknow, India • 07/2016-07/2018

High School

City Montessori School • Lucknow, India • 07/2015 - 07/2016

SKILLS

Languages: Python, Go, JavaScript, SQL

Backend/AI: Django, FastAPI, REST APIs, GraphQL, LLMs, RAG, Agentic AI, MCP

Cloud/DevOps: AWS, Terraform, Docker, Jenkins, CI/CD, Git

Databases/Testing: MongoDB, PostgreSQL, PyTest, Jest
